

# GDSC SMVDU PROJECT ANANTA: BEYOND YOUR LIMIT

## Documentation

Problem **MIT1**

Team **EduEase**

- **Problem Statement** : An integrated platform should be developed where in all the universities/Colleges provide information about the projects done by the students. We can additionally add notes/previous year paper section for different universities on our platform.
- **Solution Approach** :
  1. We will Have a dropdown like button to explore different universities in the left corner of our platform
  2. We first going to design a webpage where we can three section in main header (Projects, Notes and Previous Year Papers).
  3. We will onboard Student as well Professors so that they can see what their university student doing also to avoid Plagiarism in project content they will ensure it.
  4. We have a login page (Google Auth) for Student and Professors both.
  5. For Notes uplodation will done by authorised students on professors suggestion so that notes quality standard maintained.
  6. In PYQ section we will have section where students can upload their Exam papers for continuation of pyq section of their university.It helps to their juniors a lot
  7. We have a Hamburger Bar in the leftmost corner of our website so that individual students can access their profile section, bookmarks, sefl notes, etc
  8. We will have a notification panel for news related to different university about ongoing projects.
  9. We will also mark new/fresh uploaded content as “new”
- **Techstack** :

1. HTML	4. ReactJs
2. CSS	5. Google APIs/SDK
3. JavaScript	6. Svelte
